ColdBox Platform Utilities v2.10 Released!

Luis Majano

Nov 03, 2012

We are so proud to announce another big update to our [Adobe ColdFusion Builder](#) extension: [ColdBox Platform Utilities version 2.10](#). This update has tons of cool updates and fixes:

- Railo compatibilities so it works with Railo as your engine
- Updates for ColdFusion 10 compatibilities
- Added new ColdBox templates
- Added support for ColdBox LITE

So either [download](#) the extension and install it or if you have it installed, just click "ColdBox Platform > Check For Extension Updates..." and perform our sweet auto update!
