ColdBox Platform Utilities v3.0 Released

Luis Majano

Jun 18, 2013

We are so proud to announce another update to our [Adobe ColdFusion Builder](#) extension: [ColdBox Platform Utilities v3.0](#). This update has tons of cool updates and fixes:

Bugs Squashed

- [\[CBOXUTILITIES-19\]](#) - When inserting a property injection DSL it inserts a double :
- [\[CBOXUTILITIES-21\]](#) - Missing injection DSL contexts
- [\[CBOXUTILITIES-24\]](#) - Aspect generator not generating the required attribute for the invocation argument
- [\[CBOXUTILITIES-26\]](#) - date formatting issues on forgebox installer

Improvements

- [\[CBOXUTILITIES-23\]](#) - No longer generate `rc = event.getCollection()` on unnecessary implicit actions as they are passed now
- [\[CBOXUTILITIES-25\]](#) - Update SES rewrite rules

- [\[CBOXUTILITIES-27\]](#) - Update scaffolding templates with better HTML and bootstrap goodness

New Features

- [\[CBOXUTILITIES-22\]](#) - Update all application templates to latest upcoming ColdBox LITE and ColdBox Platform releases

So either [download](#) the extension and install it or if you have it installed, just click "ColdBox Platform > Check For Extension Updates..." and perform our sweet auto update!
