ColdBox Platform Utilities v4.0.0 with TestBox Support Released

Luis Majano

Mar 28, 2014

We are so proud to announce another update to our [Adobe ColdFusion Builder](#) extension: [ColdBox Platform Utilities v4.0.0](#). This update has tons of cool updates and fixes:

Bugs Squashed

- [\[CBOXUTILITIES-28\]](#) - Crud generator fixes bombs with extra quotes
- [\[CBOXUTILITIES-29\]](#) - Enable CRUD composition of relationships

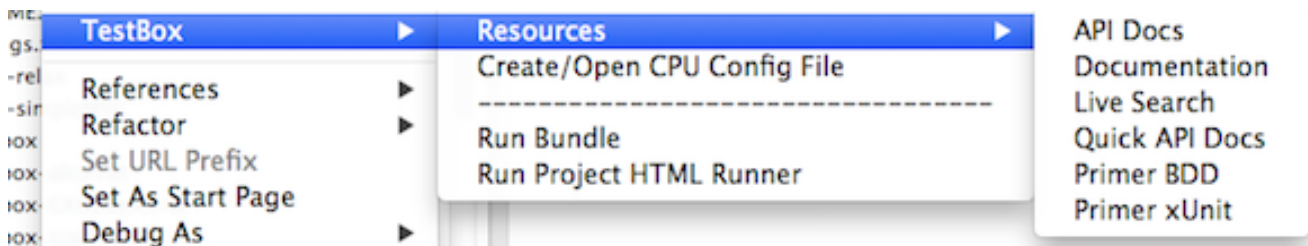

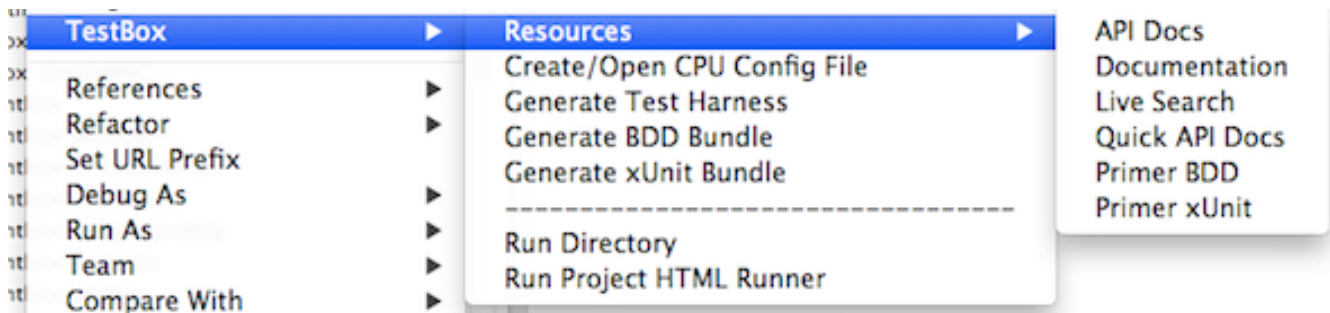

Improvements

- [\[CBOXUTILITIES-31\]](#) - Update all app templates to latest release update
- [\[CBOXUTILITIES-35\]](#) - Update Help documentation
- [\[CBOXUTILITIES-36\]](#) - Rename resources to shorter names
- [\[CBOXUTILITIES-37\]](#) - Update embedded google search engine
- [\[CBOXUTILITIES-40\]](#) - Menu ordering and cleanups
- [\[CBOXUTILITIES-41\]](#) - Make Application.cfc with non-inheritance default

New Features

- [CBOXUTILITIES-30] - Create config file for LogBox
- [CBOXUTILITIES-32] - Update all testing classes to TestBox Style and BDD support
- [CBOXUTILITIES-33] - CacheBox -> New Configuration
- [CBOXUTILITIES-34] - TestBox Support, new menu contribution for TestBox Tasks
- [CBOXUTILITIES-42] - Added global CPU configuration file for project URL and TestBox config

So either [download](#) the extension and install it or if you have it installed, just click "**ColdBox Platform > Check For Extension Updates...**" and perform our sweet auto update! Here are a few screenshots of some new functionality:

```
runnerURL : http://cf10presso.jfetmac.cbTraining/test/runner.cfm ,  
"browserURL" : "http://cf10presso.jfetmac.cbTraining/test-browser/index.cfm"  
}  
}
```
