

# TestBox v4.2 Released! (<https://www.ortussolutions.com/blog/testbox-v42-released>)

Luis Majano

Nov 20, 2020

We are excited to announce a new minor version release of TestBox ([/products/testbox](#)) version 4.2.x. To install just use CommandBox:

```
install testbox --saveDev or to update your TestBox installation  
update testbox.
```

This release includes two **important security updates** just in case you have deployed TestBox or your tests to production (**TESTBOX-294** and **TESTBOX-293**). Please note, that you should **NEVER** deploy TestBox and your tests to production. *It is a library for development purposes and it has no purpose in being deployed to production servers.*

In addition to updating your Testbox installation, you need to update any test browser files that may be in your tests folder. The current version of the Testbox test browser can be found here: <https://github.com/Ortus-Solutions/TestBox/blob/development/test-browser/index.cfm> (<https://github.com/Ortus-Solutions/TestBox/blob/development/test-browser/index.cfm>)

You can avoid installing testbox in production by using the `install --production` CommandBox command.

## Release Notes

### Fixed

- TESTBOX-294 (<https://ortussolutions.atlassian.net/browse/TESTBOX-294>) - root path in test browser not enforced ( SECURITY )
- TESTBOX-281 (<https://ortussolutions.atlassian.net/browse/TESTBOX-281>) - request.testbox: Component ... has no accessible Member with name [\$TESTID]
- TESTBOX-290 (<https://ortussolutions.atlassian.net/browse/TESTBOX-290>) - Turning on "Prefix serialized JSON with" in ACF causes issues in code coverage report
- TESTBOX-293 (<https://ortussolutions.atlassian.net/browse/TESTBOX-293>) - Force properties file to have properties extension and escape special chars ( SECURITY )

## Improvements

- TESTBOX-291 (<https://ortussolutions.atlassian.net/browse/TESTBOX-291>) - refactor usage of locks for debug utility in specs
